

User Acceptance Testing (UAT) Report

SZ Metro Ticket Generating System in ServiceNow

Date: 31 July 2026

Tester / Developer: Shaik Zuveriya Tabassum (Individual Work)

Project Name: Metro Ticket Generating System in ServiceNow (SZ Metro) | Testing Period / Status: 10 Jul 2026 to 31 Jul 2026 | PASSED & APPROVED

Project Overview: SZ Metro Ticket Generating System allows passengers to select source and destination stations, select ticket counts and passenger categories, automatically compute dynamic fares, and generate digital QR tickets inside ServiceNow.
Testing Environment: <https://myskillwallet.ai/dashboard/skillwallet/module/servicenow-global-certification>

TEST CASES EXECUTION

TEST ID	TEST SCENARIO	TEST STEPS	EXPECTED RESULT	ACTUAL RESULT	STATUS
TC-001	Catalog Booking & Fare Logic	1. Select Source: Station A 2. Select Dest: Station D 3. Select Type: Adult	Dynamic fare calculated correctly based on station distance.	Fare displayed ₹30.00 instantly upon station selection.	Pass
TC-002	QR Ticket Generation	1. Submit valid ticket form. 2. Trigger Flow Designer. 3. Check ticket output.	Generates dynamic QR code and encrypted ticket ID.	Digital ticket rendered with QR code payload.	Pass
TC-003	Same Station Prevention	1. Select Source: Station A 2. Select Dest: Station A	System displays validation error and disables submit.	Error message "Source and Destination cannot be same" shown.	Pass
TC-004	User Data Ingestion	1. Complete booking. 2. Query sys_user_data table.	Booking details, timestamp & QR stored in table.	Record created with all attributes accurately mapped.	Pass

BUG TRACKING LOG

BUG ID	BUG DESCRIPTION	STEPS TO REPRODUCE	SEVERITY	STATUS	RESOLUTION
BG-001	Fare calculation lag on rapid dropdown selection	Change destination dropdown 5 times in 2 seconds.	Medium	Closed	Optimized Script Include caching.

Sign-off & Approval: Tester / Developer Name: Shaik Zuveriya Tabassum | Date: 31 July 2026 | Status: Approved for Deployment
Notes: Solution thoroughly tested across both positive and negative scenarios with realistic Metro travel data. Includes future architecture scope for SMS/Email ticketing, payment gateway integration, and live station analytics.
